Education

Rutgers University, School of Arts and Sciences

September 2022 – May 2026

Bachelor of Science in Computer Science, Minor in Data Science

New Brunswick, New Jersey

Experience

Clubs App

June 2026 – Present

Founder & Software Engineer

Remote

- Building a cross-platform community platform with **React Native**, **TypeScript**, and **Java with Spring Boot** to help users discover local sports, fitness groups, and recreational activities
- Designing **REST APIs** and **PostgreSQL/PostGIS** data models for users, clubs, events, RSVPs, and location based searches for nearby communities and venues
- Developing real-time notifications and activity workflows using **Redis**, **Apache Kafka**, and **WebSockets**, with containerized services deployed on **AWS**

SHI International Corp.

May 2025 – August 2025

AI Solutions Development Intern

Somerset, New Jersey

- Deployed and debugged AI and HPC environments using **Linux**, **Kubernetes**, **SLURM**, and **NVIDIA DGX** systems, troubleshooting integration issues across development and testing workflows
- Developed and evaluated **Vision AI** and multimodal **GenAI** solutions, including object detection, data curation, chatbot testing, and **LLM** experimentation for enterprise use cases
- Automated infrastructure workflows with **Ansible** and supported monitoring, inventory management, documentation, and data-center visualization across technical environments using **DCIM** softwares

AI Examiner

January 2025 – May 2025

Rutgers MBS Extern

New Brunswick, New Jersey

- Designed **UI/UX** improvements for chatbot and landing-page workflows and proposed a Chrome extension to simplify access to core product features
- Led weekly team coordination, tracked deliverables, and analyzed user and competitor workflows to prioritize features and present **product requirements** and recommendations to stakeholders

Projects

DevTrack – Management Platform | *React, Go, MongoDB, REST APIs, Docker*

August 2026

- Built a full-stack project management platform with **React** and **Go** for creating projects, managing tasks, and tracking development workflows
- Developed **REST APIs** for authentication and **CRUD** operations with **MongoDB** persistence, validation, and structured data models
- Containerized the application with **Docker** and organized backend services into modular layers for maintainability and deployment

LiftTrack – Gym Progress & Analytics | *React, Python, FastAPI, PostgreSQL, Claude API*

March 2026

- Built a workout tracking platform with **React**, **FastAPI**, and **PostgreSQL** to record exercises, sets, weights, workout history, and personal records
- Developed analytics for strength progression, training volume, and workout trends to visualize performance and long-term improvement
- Integrated the **Claude API** to automate workout summaries, identify training patterns, and generate personalized progress insights

Stock Market Analysis Platform | *Python, Pandas, Scikit-learn, Yahoo Finance API, Matplotlib*

January 2025

- Built a financial analysis platform in **Python** using Yahoo Finance data to evaluate historical prices, returns, volatility, and sector performance
- Applied **Pandas**, **Scikit-learn**, and **Matplotlib** to engineer market indicators, test forecasting models, and visualize security and market trends

Technical Skills

Languages: Python, Java, JavaScript, C/C++, Go, Rust, SQL, R, HTML/CSS, PHP, MATLAB

Frameworks & Technologies: React, Next.js, Node.js, FastAPI, Flask, REST APIs, JUnit, OpenDDS

AI/ML: PyTorch, TensorFlow, Scikit-learn, OpenCV, Vision AI, LLMs, RAG, NVIDIA NeMo, Claude

Cloud, Infrastructure & Data: AWS, Azure, Google Cloud Platform, Docker, Kubernetes, Linux, Apache Spark, MongoDB, PostgreSQL, MySQL, Redis

Developer Tools & Methodologies: Git, GitHub, Jira, Confluence, Cursor, Agile Methodologies, Scrum, VS Code, Android Studio, Jupyter Notebook, GDB, Valgrind, Excel
